5.Functions

Bluetooth

Press the power button to turn on the light.
When the Bluetooth symbol " ✳ " shows
flickering on the light's screen, please open
the App on your phone to connect with the light.

Channel

Press the power button to turn on the light. Then,
press the "CH." button until the icon "CH." starts
flashing on the light's screen. At this point, you can
rotate the left and right knob on the light to switch
channels from Channel 0 to Channel 8.

Note: Channel number "0" on the light serves as backup channel and will only work when the "ALL"
button is clicked in the App

⚠ The channel and Bluetooth functions are available on the NEEWER App. You can enter the NEEWER
app to control the channel or Bluetooth of lights.

Color Temperature/Brightness

Press the power button to turn on the light.
Then you can rotate the "CCT/DIM" knob
on the light to adjust color temperature or
brightness.

Activate

Quick pressing the Activate Button " ⏱ " can turn
the light back on when it is in standby mode or mak
the light enter standby mode when it is on.
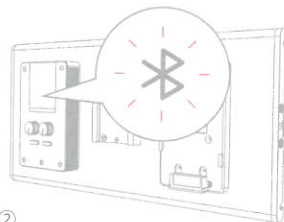

6.Quick-start Guidance

Android   IOS

Please scan the QR code on the left to download and install the NEEWER app on your smart phone with Android or iOS system.

① Download and install the Neewer App on your phone. Then register and/or log in.

② Turn on the light and wait until the Bluetooth symbol " ✳ " appears on the screen.

③ Click the "+" symbol on the App to connect your device. When the device is connected, the Bluetooth icon " ✳ " will constantly light up, which suggests that the ring light can be controlled on the app.

⚠ If the Bluetooth connection fails, the Bluetooth icon will constantly blink to suggest the need to recheck if the device is on.

# 7.Control the LED light with the App

Demo: control a single LED light

Turn on the light and press the Channel/Activate button "CH." until the symbol "CH." shows blinking on the screen.

When the "CH." shows blinking, press the DIM knob to adjust the light channel between 0 and 8 (demo: Channel 3).

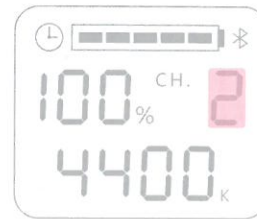

LED Video Light

Slide the control bars shown in the left picture to control the LED light.

Demo: control multiple LED lights respectively

Set the channel of LED light A as any number from 1 to 8 (demo: "1").

Set the channel of LED light B as any number from 1 to 8 (demo: "2").

Set the channel of LED light C as any number from 1 to 8 (demo: "3").

Choose the channel number (demo:1/2/3) on the App to control the corresponding LED light set in the same channel.

# Demo: control multiple LED lights altogether

Set the channel of LED light A as any number from 1 to 8 (demo: "3").

Set the channel of LED light B as any number from 1 to 8 (demo: "6").

Set the channel of LED light C as any number from 1 to 8 (demo: "8").

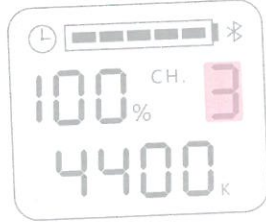

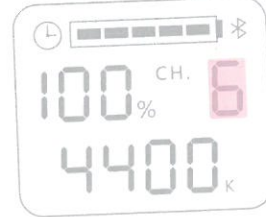

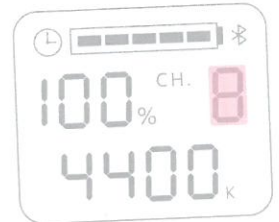

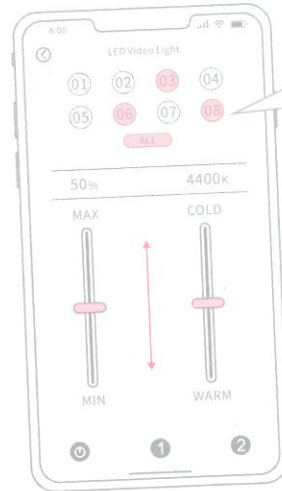

If you click the " ALL " button, all channels will be selected. Then you can control multiple LED lights altogether by sliding the control bars.

8.Delete or disconnect a device

Disconnect a device

Enter the "NEEWER" App.

NEEWER-SNL***

Enter the "Personal Center" and click "Delete Device".

Tips
Are you sure to delete the selected item?

Cancel   OK

Delete

Select the device to be deleted and click "Delete".

9.Mount LED Video Light on the Light Stand
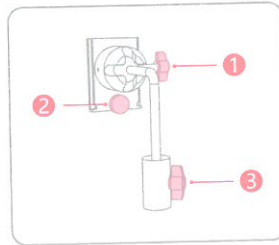

1. Light Adjustment Lever
2. Base Mount Screw
3. Stand Connection Knob

Push the base mount upwards into the square bracket on the back of the light as showed in the picture above. After the mount is fitted, twist clockwise the 2 Base Mount Screw until it is tightened.
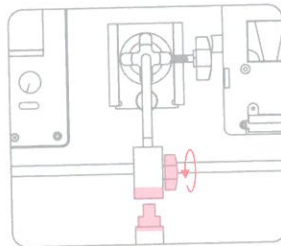

Next, connect the whole base mount to a stand and turn clockwise the 3 Stand Connection Knob until the mount is fixed on the stand.
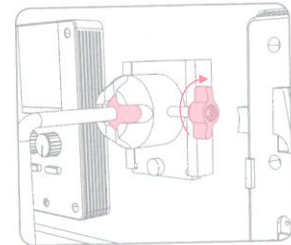

Loosen the 1 Light Adjustment Lever and adjust the light panel to a desired position, then rotate the lever clockwise until it is tightened.

The procedures on this page only apply to the SNL960 and SNL1320 smart metal LED light

Connect the light to a stand and adjust the barndoor
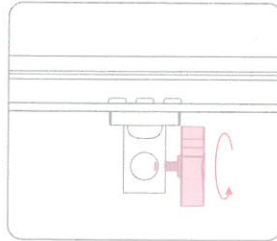

Turn the securing knob of the stand counterclockwise until it is loosened.
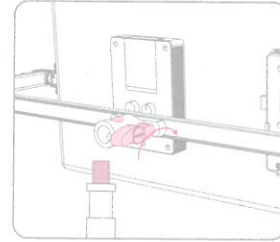

Insert the stand into the connector of the light and turn the securing knob clockwise until it is tight.

⚠ Before mounting the light to the tripod, please make sure that the tripod legs are fully extended, otherwise the light might fall down and cause human injury.
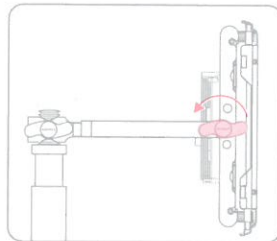

Turn the securing knob on the both sides of the light until the light body is loosened.
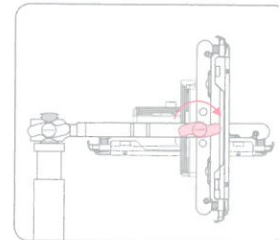

Adjust the light body to your desired position.

The procedures on this page only apply to the SNL1920 smart metal LED light.

10.Safety Notes

⚠ Please do not use the light in the
rain or in a humid environment.

⚠ Please put the cables away in
case of tripping hazard.

⚠ Please put the cables away in
case of tripping hazard.

⚠ Please do not use alcohol or liquids
to clean the LED light.

11.Caution

- Please do not stare at the light directly while it is in use, or there might be risk of visual impairment.
- Please do not cover the heat dissipation holes on the product with cloth or other items, or there might be risk of product damage.
- Please do not touch the light with wet hands in case of safety hazard.
- Please do not dismantle or modify the circuit of the item (unless professionally certified).
- Please do not expose the item to the sun for a long time.
- Please turn off the product when it's not in use.
- Failure to comply with the operation procedures and warnings listed in this manual will void the warranty.
- For your Android cellphone, the GPS is required to be turned on first.
